→ SPECIAL → NOTICE. ←

WE present this Catalogue for the purpose of calling the attention of the public to some important facts regarding the manufacture of Boots and Shoes, hoping the information may prove of benefit to many, and increase the demand for the goods we manufacture. The main reason for there being so many inferior Boots and Shoes in the market is because consumers do not endeavor, or are unable, to inform themselves sufficiently regarding the quality of the goods they purchase, but are governed solely by appearance and price.

These are often unreliable tests, as inferior goods may be finished in an attractive style, and sold at high prices; the wearer soon experiencing to his regret the truth of the adage that "appearances are often deceitful."

Manufacturers of shoddy goods have been known to say that "the people will be humbugged, and we may as well reap the harvest as others."

For ourselves, we have to say that years of steady prosperity, and constant increase of business, has confirmed us in the theory (by which we have always been guided), that the majority of people are glad to patronize those manufacturers who endeavor to make honest goods that shall be worth all they cost. We ask this class to give our goods a trial.

C. M. HENDERSON & CO.

→ PAST + AND + FUTURE. ←

OUR business which was established in a small way, in 1851, has been steadily increasing until we are sending out more goods annually than any other Boot and Shoe house in the world.

We have fully demonstrated the fact (in the face of the strongest competition) that good goods in the end will bring success.

During the thirty years in which we have stood firmly to this principle, we have weathered every financial storm and panic, besides having been twice burned out with heavy loss; the increasing confidence of the public in the quality of our goods making it possible for us to withstand these misfortunes, and to go steadily on, enlarging our business to its present unequalled proportions.

With this experience we certainly shall not hesitate to continue on the same line—always making the best goods of their class in the market.

IN addition to the many important facts regarding the manufacture of

→ BOOTS AND SHOES ←

AND THE CHARACTER OF

OUR CUSTOM MADE GOODS,

We have given in this Catalogue many valuable tables, rules, statistics, etc., which will be found of interest, besides being convenient for reference.

styles not represented here.

SECOND FLOOR, MAIN BUILDING.

WOMEN'S, MISSES' AND CHILDREN'S FINE SEWED SHOE DEP'T.

➤ TO THE LADIES. ◀

E take occasion here to call your attention to our "BEST CUSTOM SEWED SHOES" for Ladies and Misses, some of the leading styles of which we represent by cuts on the opposite page.

We claim that for *Service, Comfort and Style*, they are not surpassed.

In the manufacture of all our goods, our first objective point is to insure *service*, and in our fine sewed shoes, as in our heavy boots, every shoe must have solid leather counters insoles, outsoles, taps and fillings, and all from the very best stock.

Comfort is the next point we aim at, therefore we have our shoes made on lasts as near the natural shape of the foot as possible, and with different widths, so that we can fit almost any foot that is not actually deformed.

Recognizing that ladies naturally admire the beautiful, we employ only the most competent and artistic draughtsmen, and therefore are able to excel other manufacturers in the style and symmetry of our *fine shoes*, and point to our "Opera" or "New York" Button or Side Lace in confirmation of this claim of superiority in *style*.

It will be found that a lady's foot will look smaller in one of our fine shoes than in almost any other.

Ask for "HENDERSON'S" BEST FINE SHOES, and see that our name is plainly stamped on the bottom, also on the inside lining of each shoe.

→ Our Fine Calf Sewed Shoes ←

EVERYONE should see the shoes represented above before buying this class of goods of any other make.

They are made after the most perfect fitting and stylish patterns, from the very best fine calf-skins, all solid, handsomely finished, and we know of nothing that we can add to make them better for the purpose intended,

Those who do not want to wear a pegged shoe for out-door heavy service, will find C. M.

HENDERSON & Co's FINE CALF SEWED SHOES the best thing in the market. See that our firm name is plainly stamped on each pair of shoes.

Ask your dealers to show them to you.

→How Boots and Shoes Should be Made←

NOW that *novelty* is often used as a magnet with which to draw money from the pockets of the public, and inventions multiply, we are frequently asked as to the best method of fastening the soles of Boots and Shoes to the uppers, and we unhesitatingly reply that PEGGING and SEWING excel all other methods.

Pegging cannot be equalled for economy, and should be used for the heavier goods, while sewing stands at the head for ease and pliability, and is best suited to the lighter and finer grades.

Wooden pegs are far more ECONOMICAL than metallic screws or nails; 1st, Because they cost vastly less, and will wear as long as the leather they are driven into; (whenever metallic fastened goods are pretended to be offered as cheaply as pegged, it may be assumed that a deception is being practiced, and that the screwed or nailed goods are really made of inferior stock.) 2d, Pegged goods can be repaired with ease and cheapness, while screwed or nailed boots and shoes are frequently thrown away when the soles are worn through, although the uppers may still be good, because of the difficulty and expense of getting them repaired.

There are several other serious objections to metallic fastened goods; one being that the metal is a conductor of heat and cold, and makes cold feet in winter; another is that the screws or nails are placed so far apart that the boots sometimes leak between the soles and uppers.

A further objection, especially to screw fastenings, is that the screws frequently work upward through the insole and hurt the feet, *not being clinched*; also, when the outer sole is worn they often project, and are liable to catch in carpets, causing inconvenience and damage; so if persons desire to buy a metallic fastened boot or shoe, it is better to purchase those made with clinched nails. But the reasons above indicated are sufficient to show that either pegged or sewed goods are *much to be preferred*.

We, however, sell all kinds that the public demand, deeming our duty in the matter fully performed when we have made known the result of our experience and observation; but *advise* you to buy "HENDERSON'S" custom-made *pegged* or *sewed* goods.

THIRD FLOOR, MAIN BUILDING.

PACKING ROOM AND HEAVY PEGGED SHOE DEPARTMENT.

GREASE YOUR BOOTS.

HEAVERY and medium Boots and Shoes should be thoroughly oiled once or twice a week while being worn. Those who will spend a little time and care in this direction will find that their boots or shoes will wear much longer than if left to dry out, as they otherwise will. In sandy soil this is of as much importance as in muddy sections. The space between the edge of the sole and the upper where they join often becomes filled with gravel, and the constant friction cuts the upper off; thorough greasing in that space will prevent this. Tallow is excellent for leather, but should not be applied when very hot.

Boots and Shoes should never be placed near a hot fire, especially when they are wet; if not actually burned the life of the stock may be destroyed, rendering it liable to crack.

→ BOOT ♦ DEPARTMENT. ←

OUR "Best" Kip and Veal Calf Boots for Farmers' wear will be found the best in the market.

For twenty years we have been making these Boots here in Chicago, and we are willing to stand on the record they have made during that time.

We have hundreds of customers who say they will average a year's wear, and many say much longer. As a matter of economy you cannot do better than to buy

"HENDERSON'S" BEST BOOTS.

Our Fine Calf Boots, both French and American stock, Grain Boots, Plow Shoes, Brogans, Miners' Boots and Shoes, in fact everything made by us, will be found first-class in every respect. Look for the green label.

**Sandals to wear in the mud, they
will stay on the feet.**

CHICAGO, ILLINOIS.

Rubber Boots and Shoes.

AS we are dealing very largely in RUBBER BOOTS and SHOES, we wish to call the attention of the public to the importance of taking proper care of these goods, if they would secure the service reasonably to be expected from them.

Rubber Boots and Shoes were made originally to protect the feet in wet weather, or mud, and not to be worn in the house or during dry weather; they were afterwards made with warm linings, adapted to keep the feet warm, as well as dry, in extreme cold weather. But they are not economical for every day use, because the material is comparatively tender and not capable of enduring hard usage to the degree that leather is.

Rubber should never be brought near a hot fire, or kept in a very warm place when not in use. We venture to say that more Rubber Boots are destroyed by being subjected to heat than are worn out by actual service.

We are having made a new style *Rubber-Lined Boot*, which, for use in warm weather, will be found much better than the wool-lined, as they are cooler, do not cause the feet to perspire, and can readily be washed out at any time.

BASEMENT, MAIN BUILDING.

RUBBER BOOT AND SHOE DEPARTMENT.

On the opposite page we illustrate our

"Special Extra Quality Arctic"

AND OUR

"WARRANTED RUBBER BOOT."

This Arctic is better, not only in having an extra-heavy sole, but also in having an extra quality of upper, and it will average to outwear two pairs of ordinary Arctics.

Our "Warranted Boot" is unquestionably the best Rubber Boot made. It has an extra improved diamond tap, which is superior to any other tap made. If you want a Boot or Arctic that if properly used will wear you all winter, and with careful treatment two winters, ask for "HENDERSON'S EXTRA QUALITY ARCTIC," and "HENDERSON'S WARRANTED RUBBER BOOT."

—PRESS COMMENTS.—

(From the Chicago Tribune, Dec. 31, 1881.)

"It (the firm of C. M. Henderson & Co.) has been scrupulously careful that its goods should be just as represented, and it has been because their customers have always found their goods could be relied on, and that their promises never outran their performance, that their business grew constantly larger and larger, and the circle of their patrons became wider and wider, till their trade extended in all directions to the limit of Chicago enterprise, and for the past three years its sales have exceeded that of any boot and shoe house in the United States."

(Chicago Times, Dec. 31, 1881.)

"This house (C. M. Henderson & Co.) is probably selling now, and have been selling for several years, more boots, shoes and rubbers than any other jobbing house of the same line in the United States."

(The Inter Ocean, Dec. 31, 1881.)

"When we say that it (the firm of C. M. Henderson & Co.) does the largest jobbing trade in boots and shoes done by any house in any part of the world, we simply tell that which is known to well-informed merchants everywhere."

CHICAGO, ILLINOIS.

FACTORY.—SOLE LEATHER CUTTING ROOM.

❧ RULES FOR FINDING INTEREST ❧

On any Principal for any number of Days. The answer being in Cents, separate the two right hand figures of answer to express it in Dollars and Cents.

FOUR PER CENT.—Multiply the principal by the number of days, cut off right hand figure from product, and divide by nine.

FIVE PER CENT.—Multiply by number of days, and divide by seventy-two.

SIX PER CENT.—Multiply by number of days, cut off right hand figure and divide by six. (For 12 per cent., divide by three instead of six.)

EIGHT PER CENT.—Multiply by number of days, and divide by forty-five.

NINE PER CENT.—Multiply by number of days, cut off right hand figure, and divide by four. (For 18 per cent., divide by two instead of four.)

TEN PER CENT.—Multiply by number of days, and divide by thirty-six. (For twenty per cent., divide by eighteen instead of thirty-six.)

FIFTEEN PER CENT.—Multiply by number of days, and divide by twenty-four.

FACTORY.—BOTTOMING ROOM.

Buy the "Henderson" Warranted Rubber Boot.
Warranted not to crack. The best ever made.

HOW TO LAY OFF A SQUARE ACRE OF GROUND.

Measure 209 feet on each side, and you will have a square acre, within an inch.

CONTENTS OF AN ACRE.

An acre contains 4,840 square yards.
A square mile contains 640 acres.

LAND MEASURE.

144 square inches,	1 square foot.
9 square feet,	1 square yard.
30¼ square yards,	1 square rod.
40 square rods,	1 square rood.
4 square roods,	1 square acre.
640 square acres,	1 square mile.

MEASURE OF DISTANCES.

A mile is 5,280 feet, or 1,760 yards in length.

A fathom is six feet.

A league is three miles.

A "Sabbath-day's journey" is 1,155 yards—(this is 18 yards less than two-thirds of a mile.)

A "day's journey" is 33¼ miles.
A cubit is 2 feet.
A great cubit is 11 feet.
A hand (horse measure), is four inches.
A palm is three inches.
A span is 10¼ inches.
A pace is three feet.

If you want the best finished Calf Hand-Sewed Shoe made,
call for "Henderson's."

BUSINESS LAW CONDENSED.

The following brief compilation of Business Law is worth a careful preservation, as it contains the essence of a large amount of legal information.

It is not legally necessary to say on a note "for value received."

A note by a minor is voidable at his option.

A contract made by a minor is voidable at his option.

A contract made with a lunatic is void.

A note obtained by fraud, or from a person in a state of intoxication, in hands of original payer, cannot be collected.

If a note is lost or stolen, it does not release the maker; he must pay it, if the consideration for which it was given and the amount can be proven.

An indorser of a note is exempt from liability unless suit be commenced against the maker on the first term after maturity, or unless such suit would be unavailing, or unless at maturity of note, the maker is absent from the State so that process could not be served. This applies to Illinois only.

Notes bear interest from date only when so stated.

Principals are responsible for the acts of their agents within the scope of their authority.

Each individual in a partnership is responsible for the whole amount of the debts of the firm.

Ignorance of the law excuses no one.

It is a fraud to conceal a fraud.

The law compels no one to do impossibilities.

An agreement without consideration is void.

Signatures made with a lead pencil are good in law.

A receipt for money is not always conclusive.

The acts of one partner bind all the rest in all partnership transactions.

FACTORY—FINISHING AND PACKING DEPARTMENT.

EVERY Boot or Shoe that goes out of our factory has the pegs properly cleaned out, saving both time and annoyance to the purchaser as well as the dealer.

SIMILES.

As wet as a fish ; as dry as a bone.
 As live as a bird ; as dead as a stone.
 As plump as a partridge ; as poor as a rat.
 As strong as a horse ; as weak as a cat.
 As hard as flint ; as soft as a mole.
 As white as a lily ; as black as coal.
 As plain as a pikestaff ; as rough as a bear.
 As tight as a drum ; as free as the air.
 As heavy as lead ; as light as a feather.
 As steady as time ; as uncertain as weather.
 As hot as an oven ; as cold as a frog.
 As gay as a lark ; as sick as a dog.
 As slow as a tortoise ; as swift as the wind.
 As true as the gospel ; as false as mankind.
 As thin as a herring ; as fat as a pig.
 As proud as a peacock ; as blithe as a grig.
 As savage as tigers ; as mild as a dove.
 As stiff as a poker ; as limp as a glove.
 As blind as a bat ; as deaf as a post.
 As cool as a cucumber ; as warm as toast.
 As flat as a flounder ; as round as a ball.
 As blunt as a hammer ; as sharp as an awl.
 As red as a ferret ; as safe as the stocks.
 As bold as a thief ; as sly as a fox.
 As straight as an arrow ; as crooked as a bow.
 As yellow as saffron ; as black as a sloe.
 As brittle as glass ; as tough as gristle.
 As neat as my nail ; as clean as a whistle.
 As good as a feast ; as bad as a witch.
 As light as the day ; as dark as pitch,
 As wide as a river ; as deep as a well.
 As still as a mouse ; as loud as a bell.
 As sure as a gun ; as true as a clock.
 As frail as a promise ; as firm as a rock.
 As brisk as a bee ; as dull as an ass.
 As full as a tick ; as solid as brass.
 As lean as a greyhound ; as rich a Jew.
 And ten thousand similes equally new.

AGRICULTURAL STATISTICS.

Below will be found the number of bushels of three of the staple grains of the United States, produced in 1879, according to the census report. The estimates for 1881 are not complete at this writing, but show the corn crop to be about 1,150,000,000 bushels, wheat about 400,000,000 bushels.

STATES AND TERRITORIES.	CORN, BUSHELS.	WHEAT. BUSHELS.	OATS, BUSHELS.
